定制家具不仅看外观，也需要稳定的生产、材料准备和出货管理。

Custom furniture depends on production planning, material readiness and controlled delivery preparation.

13 包装保护到位，大幅度减少货损

Packaging protection is in place, greatly reducing cargo damage

我们会根据产品尺寸和运输风险进行分件包装、边角保护和加固处理。板件、柜门、台面等产品采用纸箱、泡沫、护角等方式保护；大件或易磕碰产品会增加木架保护，降低运输和搬运过程中的损耗。

We prepare packaging according to product size and transport risk. Panels, doors and worktops are protected with cartons, foam and corner protection. Large or fragile items can be reinforced with wooden frames to reduce damage during transport and handling.

小件分装保护，大件木架加固，让产品到场更稳妥。
